## SUMMARY

Frontend Developer with **4+** years of commercial experience in Vue/React ecosystems, working in teams from **2** to **18** members. Built full development cycle: from requirements gathering to automated releases with high test coverage, CI/CD, and monitoring. Specializing in legacy system modernization and platform development.

## EXPERIENCE

### Frontend Developer December 2024 – Present

*Rocket Science*

*Russia*

- Developed AI integrations for edtech platform: content generation tools and automatic student assignment validation for course authors, accelerating educational content creation
- Implemented E2E testing with Playwright, increasing automated tests from **0** to **30+** for critical user scenarios, reducing regression bugs between releases by **62%** and enabling safe project updates
- Migrated from Vue CLI to Vite, reducing local development environment startup time by **90%** (from **52** sec to **5** sec) and build time by **58%** (from **194** sec to **80** sec), improving developer experience for **5+** engineers
- Modernized internal UI component library by standardizing design system and extracting repetitive project code into components, eliminating duplicate code (**4.6K LOC**) and improving developer experience for **12+** engineers

### Frontend Developer November 2023 – December 2024

*Seenday*

*Russia*

- Modernized payment flow for photo sales service (**1.5K** photographers, **70K DAU** in season) with multiple purchase scenarios (albums, photoshoots, packages) and flexible gift system, leading to **20%** increase in average check for photographers
- Migrated photo marketplace (**120K LOC**) from PHP monolith to Vue, accelerating time-to-market for complex client-side tasks by **60%** and reducing onboarding from two weeks to **5–7** days
- Implemented unit test policy (Vitest) for new features, achieving **60%** coverage and improving code reliability
- Mentored **2** trainee developers through code reviews and weekly 1-on-1s, helping them grow to junior developers within the company in **3** months

### Frontend Developer September 2021 – October 2023

*AFSMD*

*Russia*

- Developed time tracking functionality with automatic cost calculation, reducing billable hours loss by **12%**
- Improved codebase quality by connecting Storybook for **50+** components and expanding TypeScript usage from **28%** to **85%**, simplifying refactoring and error detection at build time
- Implemented contract-first API approach (OpenAPI, Orval, MSW) with typed client generation and automatic mock creation, eliminating synchronization issues between teams and enabling parallel development

## EDUCATION

### Voronezh State Technical University Russia, Voronezh

*Information Systems and Technologies*

*2021 – 2025*

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, HTML, CSS

**Runtimes:** Node.js, Bun, Browser

**Frameworks:** Vue, React, Hono, NestJS

**DevOps:** Git, Gitlab/Github CI, Docker, Ansible, Prometheus, Grafana, Caddy/Nginx, Proxmox

**Libraries:** GSAP, Tanstack Query/Virtual/Table, Hono, Pinia, Effector, Redux, Zustand, Radix/Reka/Headless UI, Tailwind CSS, UnoCSS, ApexCharts, Chart.js, Orval, MSW, Grammy, Storybook, ofetch, Vitest, Playwright
